## Correction

After publication of this work [1], we noted that we inadvertently failed to include the complete list of all co-authors. The full list of authors has now been added and the Authors' Contributions and Competing Interests sections modified accordingly.

## Competing interests

The authors declare that they have no competing interests.

## Authors' contributions

DEB conceived and designed the research. DEB, AA, DGD, ADD performed the research including data collection, testing and analysis. DEB suggested extensions and modifications to the research. DEB supervised the whole research, and revised the manuscript critically. All authors read and approved the final manuscript.

## Acknowledgements

We gratefully acknowledge the help of Prof. Mehmed Ozkan, who is Institute of Biomedical Engineering of Bogazici University, and Dr. M. Oner Sanli, who is in the Urology Department of Istanbul Faculty of Medicine in Istanbul University, for their valuable feedback about the surgical interface. We gratefully acknowledge the help of Prof. Fethi Calisir, who is in the Industrial Engineering Department of Istanbul Technical University, for his valuable feedback during the design, implementation and analysis of the questionnaires to investigate the importance of usability and functionality factors. We acknowledge the help of Gokcer Eskikurt during data collection from the eye tracking system.
